

	A	B	C	D	E	F																											
1		Create a Microsoft Excel Spreadsheet that looks exactly like this one.																															
2		Add two to each of the data points under "Career Success" (C9 to C22).																															
3		Use functions to obtain the sum, count, and average values of both columns.																															
4		Use the same formatting and chart (the data plot in your graph will look different).																															
5		Hand in or e-mail me the assignment (gsaxton@brockport.edu) by start of next class.
